How to work?

Open CheapGPT.html

Type in message at message-send block.

Click "send" button or press "Enter" to send message to Cohere.

You will get the response from Cohere later.

Functions

- **Redo:** Re-answer the question.
- **Edit:** Edit your question or the response of chatbot.
- **Speak:** Speak the text.
- **Think:** Let the Cohere think.
- **View:** View the code behind the text.

Problem I met

When I asked ChatGPT to help me do the function of **LISTENING**

button and **user icon changing**, it showed alert message.

"Your request has been flagged as a potential violation of our usage policy. Please try again using a different hint."

No matter how I change the prompt and the question. It still show the alert message.
